

LETTER OF RECOGNITION

In Calgary, and throughout Canada, *Canadian Oncology Nursing Day* will honour those nurses who have taken specialized training to care for cancer patients. The theme for this year is “*The Path to Change: Oncology Nurses Leading the Way*”.

Oncology nurses educate the public in the prevention and treatment of cancer, and are involved with the process of cancer care, from prevention to detection, treatment, rehabilitation and palliative care.

The City of Calgary recognizes April 4, 2017 as *Canadian Oncology Nursing Day* and salutes the dedication and commitment of oncology nurses who demonstrate excellence in patient care, teaching, research, administration and education in the field of oncology nursing.
